Xero FAQs

What does cloud accounting mean?

Think about when you use internet banking. Every time you access this data, you're using the cloud. The cloud is a platform to make data and software accessible online anytime, anywhere, from any device with an internet connection. Online accounting means small business owners stay connected to their data and their accountants. The software can integrate with a whole ecosystem of add-ons. It's scalable, cost effective and easy to use.

Does Xero have Payroll?

Absolutely. It's easy to process your payroll, pay superannuation and stay compliant. With Payroll in Xero, your payroll information is seamlessly updated into your accounts, eliminating the need for manual data entry.

Does this comply with ATO regulations?

Changes to tax tables, superannuation guarantee rates and any levies are all taken care of automatically, without the need to install any updates. File employee tax file number declarations and your payment summary annual report direct to the ATO from Payroll in Xero. Using Xero's Auto Super feature on our Premium plans you can pay your employees super contributions with the click of a button and is the easiest way to prepare and comply with the ATO's SuperStream requirements.

How much does Xero cost?

Plans start at just \$25 per month. [See plans and pricing details.](#)

Where can I see a product demo?

Watch a 2-minute overview about Xero.

How do I convert from MYOB to Xero?

Our partner Jet Convert can take care of conversion for you, quickly and for free. They can handle most versions of MYOB, but you can also follow our [step by step conversion guide](#). It's easier than you'd think.

How do I convert from another accounting system to Xero?

Follow our [step by step conversion guide](#). It's easier than you'd think.

How do I integrate Xero with other business applications?

Our [Add-on Marketplace](#) has over 400 business applications that connect seamlessly with Xero. Choose from mobile payment software, complex inventory, eCommerce, Job Costing and more.

Is Xero secure?

Yes, your data is always safe with bank-level security. We've invested heavily to ensure your information is always protected. Find out more about our [security features](#).

How does invoicing work in Xero?

Work smarter and improve your cashflow with online invoicing. Create beautiful-looking recurring invoices – and know when they've been viewed. It's easier than ever for your customers to pay you on time using the payment link on your online invoices.

How can I manage trust accounting in Xero?

If you're referring to money held in trust on behalf of clients for example Lawyers and Real Estate Agents, there are strict rules governing this process and we have [add on](#) Partners in these areas that specifically

handle this type of accounting process that integrate seamlessly with Xero. If you are looking to use Xero to manage a Trust Entity type for the purposes of holding property and assets for the benefits of others, then Xero should be absolutely fine and handled just like any other small business using Xero.

How do I manage inventory?

Inventory management in Xero tracks the value of your inventory and improves stock control. For advanced inventory management, explore the [inventory tools](#) that integrate with Xero.

Can I use Xero on my mobile device?

Yes, our mobile app Xero Touch makes it easy to run your business from your iOS or Android device. Find out more about [Xero Touch](#).

Can I import my data from Excel, Wave or Freshbooks?

Yes, you can import Excel spreadsheets, PDF files, Google Docs – not to mention MYOB – into Xero. See more details on [importing accounting data into Xero](#).

What software do I need to install and run Xero?

There's nothing to install. Xero runs online in your web browser – just log in and you're ready to go. Check you're using one of these supported browsers:

- Internet Explorer (10 or newer)
- Firefox
- Safari
- Chrome

If you have an iOS or Android device, log in to Xero using our mobile app [Xero Touch](#).

How does Xero compare to Desktop Software?

Desktop software requires frequent updates. Updates need to be installed by the user and are usually received by way of a CD in the post from the vendor. The data sits on one central hard drive which means multiple user access, backups (if done at all) and security will always be an issue. Transferring data is complicated and usually done using a USB stick which is not secure or reliable. Using desktop software you are unable to connect to online data sources such as your Bank, meaning a significant portion of your time will be spent performing low value tasks such as manual data entry. Collaborating with your advisors in real time is not possible which means that the quality of advice you receive will be impacted and a significant portion of their time will be spent on low value repetitive tasks which could otherwise be automated.

Do I need to update my tax tables in Xero?

No. As Xero is 100% cloud based, we take care of the ATO compliance updates for you. And, there's no charge for this.

Can I run multiple businesses on Xero?

Yes, however you will require a separate subscription for each individual organisation. Xero does offer discounts for multiple organisations that you put onto our platform.
